Accomplished Principal Engineer at G2 with over a decade of experience architecting scalable, data-driven software systems that serve millions of users worldwide. Adept at translating business requirements into resilient technical strategy, with deep expertise in microservices architecture, Ruby on Rails, and AI-assisted engineering workflows. Proven track record of technical leadership, promoted from Staff Engineer to Principal Engineer while driving initiatives in AI-driven self-healing systems and agentic developer tooling. Recognized as G2's PEAK Professional of the Year (2025) and Most Valuable Professional (2024) for outstanding technical contributions. RubyConf India 2025 speaker and active technical writer, committed to mentoring engineering teams and staying at the forefront of emerging technology.

Skills

- ◆ **AI-Assisted Engineering & Agentic Systems** — LLM application integration (multi-provider routing, cost/budget governance), agentic workflow design and multi-agent orchestration, AI developer tooling (Claude Code, MCP, custom automation for code review/test triage/CI remediation), AI-ready content engineering
- ◆ **Ruby on Rails & Hotwire**
- ◆ **Software & Microservices Architecture**
- ◆ **API Design & Event-Driven Systems (Kafka)**
- ◆ **Databases (MySQL, PostgreSQL, MongoDB)**
- ◆ **Cloud & DevOps (AWS, Docker, CI/CD)**
- ◆ **Agile Delivery & Testing (RSpec)**
- ◆ **JavaScript & Component Architecture (Stimulus.js, Storybook, Turbo)**
- ◆ **Python & Go**
- ◆ **Performance Engineering** — database query optimization, caching/shared-resolver patterns, reducing redundant service calls
- ◆ **Production Reliability** — race-condition/concurrency remediation, defensive coding at scale
- ◆ **Product Analytics** — event instrumentation and funnel analysis
- ◆ **Third-Party Integration Engineering** — HubSpot, Salesloft, Clearbit, external API contracts
- ◆ **Technical Leadership & Mentoring**

Work History

Principal Engineer

Apr 2026 - Current

G2, Bengaluru, India

- Promoted to Principal Engineer to lead technical strategy and architecture direction across G2's core platform.
- Driving adoption of AI-driven engineering practices, including agentic developer workflows and self-healing systems.
- Setting technical vision for microservices architecture supporting millions of users worldwide.

Staff Engineer

Jun 2024 - Apr 2026

G2, Bengaluru, India

- Led design and development of scalable, data-driven solutions serving millions of users worldwide, providing technical leadership across microservices architecture.
- Awarded Most Valuable Professional (MVP) in 2024 for outstanding technical contributions and leadership.
- Won 3rd place in G2 Hackathon FY25 for innovative problem-solving.
- Led technical initiatives in AI-driven self-healing applications.
- Mentored engineering teams on system architecture, code quality, and best practices.
- Named G2 PEAK Professional of the Year (2025) for driving impact across the organization.
- Spoke at RubyConf India 2025 on modern Ruby on Rails architecture.

Associate Software Architect

Apr 2023 - Jun 2024

Rently, Coimbatore

- Developed robust and scalable software architectures, reducing maintenance costs and improving system stability across cloud services.
- Enhanced software performance by 10% through in-depth bottleneck analysis and code optimization.
- Mentored 30+ junior developers on software architecture design and coding best practices.
- Optimized database structures, improving query performance and end-user response times.

Technical Lead

Jul 2020 - Apr 2023

Rently, Coimbatore, India

- Led 15+ development teams, ensuring application security, scalability, and stability.
- Owned end-to-end delivery of innovative, performant features across software applications.
- Set technical direction on clearing tech debt, including technology, tooling, and infrastructure.
- Facilitated knowledge-sharing sessions to raise team skill-sets and drive innovative solutions.

Senior Backend Developer

Mar 2019 - Jul 2020

MEDICI, Bangalore, India

- Built and deployed 3 Ruby on Rails applications from scratch in a cloud environment.
- Owned product features end-to-end, from design through implementation.
- Integrated payment gateway and third-party services for a platform serving 23,000+ users.
- Performed code reviews across the team to maintain code quality.

Lead Backend Developer

May 2018 - Mar 2019

myBataz, Bangalore, India

- Revamped backend architecture of the Ruby on Rails application, applying the open-closed principle.
- Spearheaded RESTful APIs for web and mobile clients across 25+ features.
- Directed product roadmap and technical requirements planning in collaboration with leadership.
- Delivered ecommerce, Bataz Finder, and Digital Fashion Show features reaching 330,000+ users globally.

◆

Software Developer

Oct 2015 - May 2018

Hewlett Packard Enterprise, Bangalore, India

◆

Led automation of ServiceNow ticketing tool which significantly minimized manpower of 6 members in operational processes.

◆

Pioneered comprehensive automation initiative aimed at reducing manual intervention within ServiceNow ticketing tool.

◆

Collaborated with lead developers to define complete architecture for both front-end and back-end of automation system.

◆

Projected and seamlessly integrated potential use cases, ensuring tool's capabilities aligned with and addressed various operational requirements.

◆

Education

◆

Bachelor of Technology: Information Technology

Apr 2011 - Apr 2015

PPG Institute of Technology – Coimbatore

◆

Certifications

- ◆

Claude Certified Architect – Foundations, Anthropic (2026) — verify: credly.com/badges/6d244dbb-6ef2-45aa-b346-439c30735010
- ◆

Certified in Java 2 Standard Edition and Java 2 Enterprise Edition

◆
