

DEEPAN KUMAR A

Principal Engineer | Software Architecture | AI-Assisted Engineering

Bengaluru, Karnataka, India • +91 8072286708 • deepan.ppgit@gmail.com

• linkedin.com/in/deepankumar-dev • deepankumar.com • medium.com/@deepan.ppgit

PROFESSIONAL SUMMARY

Accomplished Principal Engineer at G2 with over a decade of experience architecting scalable, data-driven software systems serving millions of users worldwide. Deep expertise in microservices architecture, Ruby on Rails, and AI-assisted engineering workflows, with a proven track record of translating complex business requirements into resilient technical strategy. Promoted from Staff Engineer to Principal Engineer while driving initiatives in AI-driven self-healing systems and agentic developer tooling. Recognized as G2's PEAK Professional of the Year (2025) and Most Valuable Professional (2024). RubyConf India 2025 speaker and active technical writer, committed to mentoring engineering teams and staying at the forefront of emerging technology.

CORE COMPETENCIES & TECHNICAL SKILLS

Languages & Frameworks:	Ruby on Rails, Hotwire (Turbo, Stimulus.js), Python, Go, JavaScript
AI & Agentic Systems:	LLM integration (multi-provider routing, cost/budget governance), agentic workflow design, multi-agent orchestration, Claude Code, MCP, custom AI tooling for code review / test triage / CI remediation
Architecture & Design:	Microservices architecture, API design, event-driven systems (Kafka), RESTful APIs, system scalability & reliability
Databases:	MySQL, PostgreSQL, MongoDB — query optimization, schema design, caching & shared-resolver patterns
Cloud & DevOps:	AWS, Docker, CI/CD pipelines
Testing & Quality:	RSpec, Storybook, component architecture, code review practices
Third-Party Integrations:	HubSpot, Salesloft, Clearbit, payment gateways, external API contracts
Leadership & Analytics:	Technical strategy, engineering mentorship, cross-functional collaboration, product analytics, event instrumentation & funnel analysis
Performance Engineering:	Database query optimization, N+1 elimination, shared-resolver & caching patterns, reducing redundant cross-service calls, profiling & bottleneck analysis
Production Reliability:	Race condition & concurrency remediation, defensive coding at scale, incident response, observability, production monitoring & alerting
Developer Experience & Tooling:	Custom CI/CD automation, automated test triage, code review workflows, PR bot integrations, developer onboarding & standards documentation

KEY ACHIEVEMENTS

► Promoted Staff → Principal Engineer at G2, one of the fastest engineering tracks in the org	► Named PEAK Professional of the Year 2025 & MVP 2024 at G2 for cross-org technical impact
► Automated ServiceNow workflows at HPE — eliminated 6 FTEs worth of manual operational effort	► Architected features reaching 330,000+ global users (myBataz) and 23,000+ users (MEDICI)
► Mentored 30+ junior engineers on architecture & best practices across Rently teams	► Speaker at RubyConf India 2025 ; active technical blogger on Medium; Claude Certified Architect (Anthropic, 2026)

WORK EXPERIENCE

Principal Engineer

Apr 2026 – Present

G2 · Bengaluru, India

- Promoted to Principal Engineer to lead technical strategy and architecture direction across G2's core platform serving millions of users worldwide.
- Driving adoption of AI-driven engineering practices, including agentic developer workflows and self-healing systems.
- Setting technical vision for microservices architecture and platform scalability initiatives.

Staff Engineer

Jun 2024 – Apr 2026

G2 · Bengaluru, India

- Led design and development of scalable, data-driven solutions serving millions of users, providing technical leadership across microservices architecture.
- Named G2 **PEAK Professional of the Year (2025)** and awarded **Most Valuable Professional (MVP) 2024** for outstanding technical contributions.
- Won 3rd place in G2 Hackathon FY25 for innovative problem-solving and prototyping.
- Led technical initiatives in AI-driven self-healing applications, reducing operational toil and improving system reliability.
- Mentored engineering teams on system architecture, code quality, and engineering best practices.
- Spoke at **RubyConf India 2025** on modern Ruby on Rails architecture.

Associate Software Architect

Apr 2023 – Jun 2024

Rently · Coimbatore, India

- Developed robust, scalable software architectures that reduced maintenance costs and improved system stability across cloud services.
- Enhanced software performance by **10%** through in-depth bottleneck analysis and targeted code optimization.
- Mentored **30+ junior developers** on architecture design and coding best practices.
- Optimized database structures, improving query performance and end-user response times.

Technical Lead

Jul 2020 – Apr 2023

Rently · Coimbatore, India

- Led **15+ development teams**, ensuring application security, scalability, and production stability.
- Owned end-to-end delivery of innovative, high-performance features across software applications.
- Set technical direction for clearing tech debt, including technology, tooling, and infrastructure modernization.
- Facilitated knowledge-sharing sessions to raise team skill levels and drive innovative solutions.

Senior Backend Developer

Mar 2019 – Jul 2020

MEDICI · Bengaluru, India

- Built and deployed **3 Ruby on Rails applications** from scratch in a cloud environment.
- Integrated payment gateway and third-party services for a platform serving **23,000+ users**.
- Owned product features end-to-end from design through implementation; led code reviews to maintain team quality standards.

Lead Backend Developer

May 2018 – Mar 2019

myBataz · Bengaluru, India

- Revamped backend architecture of the Ruby on Rails application applying the open-closed principle for long-term maintainability.
- Spearheaded RESTful APIs for web and mobile clients across **25+ features**.
- Delivered ecommerce, Bataz Finder, and Digital Fashion Show features reaching **330,000+ users globally**.

Software Developer

Oct 2015 – May 2018

Hewlett Packard Enterprise · Bengaluru, India

- Led automation of ServiceNow ticketing workflows, **eliminating manual effort equivalent to 6 FTEs** in operational processes.
- Pioneered a comprehensive automation initiative reducing manual intervention across the ServiceNow ticketing tool.
- Collaborated with lead developers to define full front-end and back-end architecture for the automation system.

EDUCATION

Bachelor of Technology – Information Technology

2011 – 2015

PPG Institute of Technology, Coimbatore

CERTIFICATIONS

- **Claude Certified Architect – Foundations**, Anthropic (2026) — Verify on Credly
- **Certified in Java 2 Standard Edition (J2SE) and Java 2 Enterprise Edition (J2EE)**
